3M™ SecureFit™

3M™ SecureFit™ is already the professional's choice for protective eyewear, and the new 600 Series just makes it better. 3M™ SecureFit™ 600 Series Protective Eyewear combine the best features of existing models, and add new ones. They are designed for maximum comfort, fit and clarity, so they stay on and you stay protected.

A host of options means that there is the right version for any situation – lens colour choices, anti-scratch or 3M™ Scotchgard™ Anti-Fog coating, Pressure Diffusion Temple (PDT) technology for security and comfort, foam gasket and more.

Professional design for professional people.

There is no reason protective eyewear shouldn't look good. We designed the 600 Series to be something you'll enjoy wearing. The stylish yet tough semi-rimless frame features our unique Pressure Diffusion Temple technology to stay on securely even during rapid movement, while still staying comfortable. The lenses come in a range of colours and coatings for maximum protection and clarity for your particular situation, including our 3M™ Scotchgard™ Anti-Fog coating.

Patented 3M™ Pressure Diffusion technology

Stylish dual-lens frame design

3M™ Scotchgard™ Anti-Fog coating

Multiple lens colour and coating options

Pressure Diffusion Temple (PDT) technology.

Any glasses-wearer can confirm the importance of a comfortable fit. Glasses that don't feel good don't get worn. So to do its job, protective eyewear needs to be comfortable all day, while fitting securely enough to stay on even during rapid movement. Our PDT technology does exactly that while also protecting the temples. The glasses stay on securely without discomfort, all day long.

The technology.

3M research works constantly to improve safety, design and comfort standards. To design spectacles that fit everyone, the facial features of a wide range of populations were examined in a large-scale global study using the latest research methods.

Learn more: www.3m.eu/securefit600

600 pressure points on the face were examined to develop the revolutionary frame providing even pressure.

Special temple design with multiple struts provides constant pressure equalisation.

Revolutionary SecureFit™ technology:

Pressure Diffusion Temple (PDT).

- 3M's patented SecureFit™ PDT technology regulates the amount of force on individual head sizes to ensure the optimum pressure for a secure and comfortable fit.
- The wrap-around design means that the pressure is applied on the less sensitive back of the head. The glasses feel lightweight and comfortable, yet stay secure, even during rapid movement by the wearer.
- The extremely flat and flexible temple design is ideal for combining with 3M™ Protective Earmuffs, with minimal loss of attenuation.

With 3M™ Scotchgard™, the difference is clear.

Fogged-over spectacles are annoying at the best of times, and in hazardous work environments they can be downright dangerous. You need clear vision under all conditions. So we provide it with our new 3M™ Scotchgard™ Anti-Fog coating. On both sides of the lens, it makes water droplets flatten out and form a thin film you can clearly and easily see through.

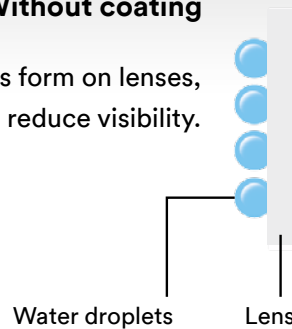

3M™ Scotchgard™ Anti-Fog coating.

Long-lasting clarity.

Without coating

When microscopic water droplets form on lenses, the lenses fog over and reduce visibility.

With 3M™ Scotchgard™ Anti-Fog coating

The new coating on both sides makes water droplets spread out into a thin, transparent film. More light can pass through and the view is clear.

3M™ Scotchgard™ Anti-Fog coating.

Tough and long-lasting

The anti-fog coating is exceptionally durable.

- Retains effectiveness even after 25 or more lens washes.
- Dilute disinfectants and alcohol-soaked cleaning tissues do not impair the anti-fog coating.
- Highly scratch-resistant for long life.

EN standards

Meets and exceeds the requirements of the **K** and **N** additional tests in the EN 166:2001 standard for protective eyewear:

- **K:** Test for abrasion by fine particles.
- **N:** The lens must remain unfogged for eight seconds.

Rugged Anti-Scratch coating.

Long-term scratch-free.

- Five times more scratch-resistant than standard 3M hard coats, the Rugged Anti-Scratch coating protects from severe abrasion and extends durability.

3M™ SecureFit™ 600 Series – available in multiple lens options to suit the needs of many applications.

Lens	Options	Product ID	Description
Clear	3M™ Scotchgard™ Anti-Fog	SF601SGAF-EU	The generic clear lens protects against UV light and is available in two coating options: <ul style="list-style-type: none"> • 3M™ Scotchgard™ Anti-Fog coating • RAS – best performing 3M anti-scratch coating to protect against severe abrasion and extend durability
	With foam gasket, 3M™ Scotchgard™ Anti-Fog	SF601SGAF/FI	
	Rugged Anti-Scratch (RAS)	SF601RAS-EU	
Grey	3M™ Scotchgard™ Anti-Fog	SF602SGAF	Protects against UV light and reduces glare from sunlight. Popular for outdoor daytime work environments.
Amber	3M™ Scotchgard™ Anti-Fog	SF603SGAF	Excellent protection against UV light and improved contrast. Popular for quality inspections.
IR	Shade 1.7, anti-scratch	SF617AS-EU	1.7 popular for welding assistance
	Shade 3.0, anti-scratch	SF630AS-EU	3.0 popular for gas welding
	Shade 5.0, anti-scratch	SF650AS-EU	5.0 popular for torch work and cutting
Polarised		SF611AS-EU	Protects against UV light. Blocks horizontal reflective glare and reduces sunlight.
Indoor/ Outdoor		SF610AS-EU	Protects against UV light and reduces brightness when needed. Useful for changing working environments such as those experienced by forklift truck drivers.
Replacement foam gasket		SF600FI	Keeps foreign objects reliably away – for even more peace of mind.

You asked. We listened.

And we added a little more safety and comfort for your 3M™ SecureFit™ 600 and 400.

The innovative foam gasket can be applied to the inside of the glasses to dependably keep out foreign objects, for even more peace of mind.

3M can help you validate your choice of protective eyewear.
